HEALTH, SAFETY AND ENVIRONMENT POLICY

BBW the manufacturers of Wheel Balance Weights, is committed to providing a Safe, Healthy, and Cleaner Greener Environment through:

- Prevention of pollution and hazards related to occupational health and safety.
- Commitment to comply with applicable legislations, regulations, and other requirements related to Health, Safety & Environment.
- Continual improvement in environmental performance, prevention of occupational illness, and safety issues.
- Initiatives on eco-efficiency, waste reduction, and minimizing risks and impacts due to occupational health and safety hazards.
- Training and active involvement of all employees and contract personnel on occupational health, safety, and environment requirements.
- This policy is communicated to all employees, contract personnel and made available to interested parties and reviewed periodically to ensure its continuing suitability, adequacy, and effectiveness.

1. Energy Use and GHG Emissions Management

BBW is committed to measuring and reducing energy consumption and greenhouse gas emissions to combat global warming. We promote the use of renewable energy sources, implement energy-efficient practices, and regularly monitor and report our carbon footprint.

2. Water Resources Management

BBW is dedicated to sustainable water use. We measure water consumption and wastewater discharge, implement reduction targets, and enhance water recycling practices to minimize environmental and human health impacts.

3. Pollutant Management

BBW maintains strict compliance with environmental laws and internal standards to control emissions to air, water, and soil. We aim to minimize the release of pollutants that could harm the environment and public health through effective controls and monitoring.

4. Circular Economy and Waste Management

We support circular economy principles by minimizing waste, maximizing recycling and reuse, and considering the full product life cycle. BBW regularly tracks waste generation and sets reduction and recycling targets to reduce our ecological footprint.

5. Chemicals Management

BBW ensures the safe handling, storage, and disposal of chemicals. We maintain a chemical inventory, provide training, and implement hazard communication practices. All hazardous substances are tested, labelled, and managed in compliance with relevant regulations.

6. Biodiversity Protection

BBW assesses the environmental impacts of its operations on biodiversity. Measures are taken to prevent or mitigate adverse effects on ecosystems, promote restoration of natural habitats, and conserve local flora and fauna near our facilities.
